

## Quantify Your Risk

In this economic climate, it is critical to quantify your risks, protect your information and reduce costs - all while enabling operational efficiencies.

### Quantify Your Risk

In this economic climate, it is critical to quantify your risks, protect your information and reduce costs - all while enabling operational efficiencies. The below resources will enable you to quantify your risk of network vulnerabilities, unmanaged applications and unmanaged removable devices:

#### Vulnerability Scanner - Scan Your Network and Assess Your Vulnerabilities

As the economic climate worsens, the risks to your business systems and vital information continue to rise. However the majority of your risk can be mitigated by streamlining your vulnerability management process.

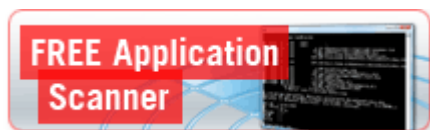

With Lumension's Vulnerability Scanner you can:

- » Automatically discover all devices on the network
- » Scan devices for OS, application, policies, and security configuration vulnerabilities
- » Assess and prioritize vulnerabilities by criticality
- » Deliver actionable reports to create enforceable policies

#### Application Scanner - What Applications are on Your Network?

By discovering what applications are running within your network you will uncover:

- » What applications are necessary to your operations?
- » If malicious data threats are on your network?
- » If you are buying more licenses than you really need?

Getting an accurate view of IT usage is the first step to developing an application whitelist which puts you in control of your information and your business.

#### Device Scanner - Assess Your Endpoint Security Risk

If left unmanaged, removable devices can jeopardize the security of your data through:

- » Data Leakage
- » Malware Introduction

Uncover the truth about what removable devices have ever been connected to your endpoints.

### About Lumension

Lumension™, Inc., a global leader in operational endpoint security, develops, integrates and markets security software solutions that help businesses protect their vital information and manage critical risk across network and endpoint assets.

Lumension enables more than 5,100 customers worldwide to achieve optimal security and IT success by delivering a proven and award-winning solution portfolio that includes Vulnerability Management, Endpoint Protection, Data Protection, and Reporting and Compliance offerings. Lumension is known for providing world-class customer support and services 24x7, 365 days a year.

Headquartered in Scottsdale, Arizona, Lumension has operations worldwide, including Virginia, Florida, Luxembourg, the United Kingdom, Spain, Australia, India, Hong Kong and Singapore.
